ENCYCLOPEDIA XVIII
FIVE DOLLARS

PINECREST . . . DESIGNERS & MANUFACTURERS OF BEAUTIFUL WOOD PRODUCTS!

THROUGH THE DEVELOPMENT OF AN INDUSTRIAL TECHNICAL CENTURY OUR WAYS CHANGE, BUT MAN AND WOOD HAVE GONE TOGETHER THROUGH HISTORY . . . GROWING TOGETHER.

YOU CAN GO FROM THE POINT THAT THE USE OF WOOD IS AS OLD AS MAN. THE WOOD HISTORY IS THE HISTORY OF OUR EARTH AND AS LONG AS MAN BUILDS HIS OWN SURROUNDINGS, SO LONG WILL WOOD SERVE HIM.

In this Encyclopedia Number XVIII for the professional designer, we have put together the finest and most versatile collection of premium decorative panels and doors ever assembled.

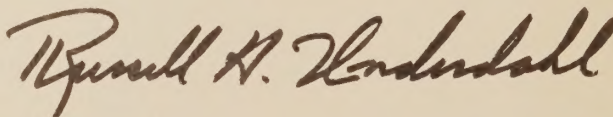

The examples shown herein are only a small portion of Pinecrest's custom collection that is as large as your designing imagination. Our experienced estimating staff will assist you on any job regardless of size.

Pinecrest's artistry and skills with wood have given us an international reputation for SERVICE, QUALITY and INGENUITY second to none. Our every effort is to merit this reputation.

At Pinecrest, "Old World Craftsmanship", is an everyday way of life. In eighteen years, we have supplied more QUALITY installations than most other manufacturers combined.

Many of our designs are copyrighted with the United States Patent Office or applied for. Nearly every item can be made to your individual requirements. YOU DESIGN IT, WE WILL MAKE IT.

As you examine our incomparable collection, please keep in mind that this is only a SMALL FRACTION of our capabilities.

President

WHY PINECREST PRODUCTS?

Because we have a reputation for quality and service and our line offers the largest selection in traditional, classic and contemporary styling. Our collection of panels and doors is wide, varied and ever-changing. Panels shown in this catalog are not limited to styling as shown, but are completely interchangeable. Panels can be combined and assembled in many ways to achieve an endless variety of effects. You can actually do your own designing. Let one of our experienced estimators help you with your special requirements. When you compare our quality, you will know why more decorators, architects and designers choose Pinecrest above all others.

OUR 18TH YEAR

THE INCOMPARABLE FEATURES OF PINECREST SHUTTERS

INDIVIDUAL PROCESS:

- Each custom shutter order is processed through modern Pinecrest manufacturing procedures.
- Pinecrest custom shutters are custom made to your exact requirements.
- Pinecrest custom shutters are not trimmed from stock panels. We manufacture each panel the same size to fit exact opening. To our knowledge we are the only true custom manufacturer in the world. 99% of all other manufacturers take standard size panels and trim to size.
- Each panel is precision made, insuring you a proper fit.

FURNITURE QUALITY FINISHES:

- Unfinished panels are thoroughly sanded, ready for finishing.
- All Glidden Paints and Stains are standard.
- A bottle of touch-up paint is sent with each color ordered.
- Stain finishes are protected with 1 coat of sanding sealer and 1 coat of lacquer.
- Custom finishes available at nominal charge. Color sample submitted for approval.

- Due to the distinctive variation of wood grains and textures, the stain finishes will vary. Each tree grows differently and textures vary. This is the beautiful characteristic of wood.

ENGINEERING PROCEDURES:

- Precision cut balanced louvers for delicate easy action.
- Rabbeted inside stiles for proper light control and better appearance.
- Louver tension for positive control keeps louvers in exact position.
- All custom shutters are hinged together with mortised interpanel hinges. This eliminates the checkerboard effect as hinges are not attached to the face of the panel.
- Only quality selected premium kiln dried woods.
- Pinecrest custom louvers are easily repaired when damaged.
- Replacement louvers are easily available, easy to install.
- Patented lock joint tongue and groove stile. Dowel and glued construction is a definite assurance of long life and trouble free performance. Patent 194,495.

COMPLETE SERVICES

ACKNOWLEDGEMENTS:

All orders are processed and acknowledged via air mail the day they arrive. Due to custom nature of our business orders are noncancelable.

SAMPLES:

Expeditious handling of all sample requests.

LITERATURE:

Additional catalogs upon request. Paint and stain cards available upon request.

DELIVERIES:

We continue to maintain an expedient shipping schedule. Shipping dates are calculated as closely as possible to date of shipment.

Opening heights: 80" 84" 96" 1-1/8" premium pine - No rabbet - no bead, 2" wide side stiles. Factory installed hinges. Track included with instructions. Factory makes all track allowances. Divider rail placement 36" from floor to center of divider rail. Weathered panels, walnut stain, 60"x80" opening shown. For Ante Bellum bifolds with raised panel bottoms order as Style: AB13. Decorator knobs as shown additional cost. Refer to price list A.

CUSTOM ANTE BELLUM PLANTATION SHUTTERS

Style: AB10

3½" blade louvers - 1-3/8" thick premium pine, 2" wide side stiles - no rabbit - no bead- center divider rail. Available in 1-1/8" thickness or 2½" blade louvers. Panels shown each 27" wx100"h. To price style as shown refer to Price List A.

ANTE BELLUM PLANTATION SHUTTERS Style: AB7

To price refer to price list A. Custom 1-1/8" thick doors and divider panels. No rabbet - no bead - 2" wide side stiles. Wide 2 1/2" louvers for that special place. Movable louvers that may be adjusted to give the degree of privacy and air circulation desired. Panels shown 20"wx96"h. Most sizes available. Available up to 36"wx96"h without divider rail. Order as style: AB8 if divider rail is desired. Standard placement 36" from floor to center of divider rail. Order as Style: AB9 if raised panel is desired, 36" from floor to center of divider rail. 3 1/2" blade louvers available. 1-3/8" thickness available.

ANTE BELLUM PLANTATION PATIO FOLDS 2 1/2" Blades - Style: AB11

To price refer to price list A. Patio louver folds give more privacy and permanence. Doors fold to small area. Patio folds add beauty, insulation and light control to room. Panels glide on casters. Factory installed hinges, casters and mounting strip.

Standard opening widths: 3', 4', 5', 6', 7', 8', 9', 10'. Standard opening heights: 6'8", 7', 8', 1-1/8" thick - square edges - 1 1/2" wide stiles. 6'w x 7'h opening shown - each panel 18" wide. Patio folds also available in traditional 1 1/4" blade louvers. Custom sizes available. 1 1/4" louvers have 1-3/8" wide beaded stiles. Refer to price list A.

ATTACHED WOOD HANGING STRIPS

Strips attached behind panels.

SIMPLE TO INSTALL!

No more costly installations. The average window takes just minutes to install.

Because:

1. All hinges are attached.
2. Adjustable hanging hardware is used (non-adjustable used on Ante Bellum Plantation shutters only).
3. Wood hanging strips are attached to hanging hinges.
4. Only 4 screws applied to the pre-drilled hanging strips are required to hang 4 window panels. This requires only a screwdriver and several minutes.

All Pinecrest $\frac{3}{4}$ " custom window panels are available with standard $\frac{5}{8}$ "x $\frac{5}{8}$ " hanging strip installed behind panels. Standard $1\frac{1}{4}$ "x $\frac{3}{4}$ " strip used behind $\frac{3}{4}$ " custom Ante Bellum shutters. Order must specify if attached strips are required. Refer to Price List B for hanging strip prices.

HOW TO INSTALL EASILY AND ACCURATELY WITH ATTACHED HANGING STRIPS

INSIDE INSTALLATION

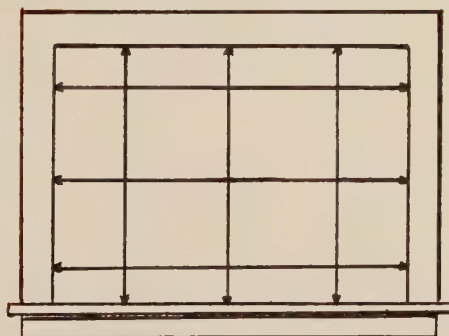

1. Remove pin from the hanging hinge which separates hanging strip from panel.
2. Place hanging strip in appropriate position on inside casing face and attach with the two long screws furnished.
3. Align hinge leaf on shutter with leaf on hanging strip and drop in pin.
4. We do not recommend attached hanging strips on Ante Bellum shutters for inside installations.

OUTSIDE INSTALLATION

1. Remove pin from the hanging hinge which separates hanging strip from panel.
2. Place hanging strip in exact position as measured on top of casing and attach with the two long screws furnished.
3. Align leaf on shutter with leaf on hanging strip and drop in pin.
4. Non-adjustable hinge used on Ante Bellum shutters, so merely screw strip into outside casing.

HOW TO MEASURE EASILY AND ACCURATELY

INSIDE INSTALLATION

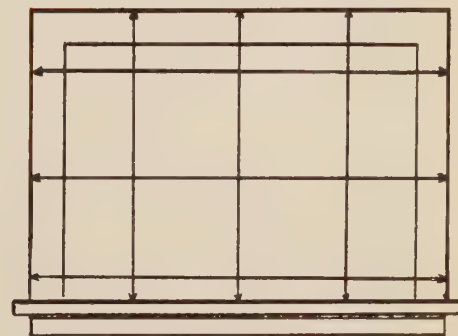

1. Measure the inside height and width at several points and record the narrowest.
2. For double hung windows measure top and bottom separately. Factory will make necessary allowances.
3. In order for shutters to be flush with window casing when strips are attached behind panels, $1\frac{1}{2}$ " of flat surface is required for mounting.

I. M. (Inside mounting measurement)

On inside measurements an allowance will be taken off of the height for necessary clearance. Factory makes allowances for all hinges and center clearance. Window Panels ordered without Hanging Strips . . . Interpanel and hanging hinges mortised unless otherwise specified. Hanging hinges will not be mortised for 1-1/8" thick panels.

OUTSIDE INSTALLATION

1. Measure width and height at several points of the area to be covered and record widest.
2. The best looking outside installation covers all the casing. Minimum of $\frac{3}{4}$ " of flat surface is required on each casing face to attach hanging strip.
3. For double hung windows measure top and bottom separately.

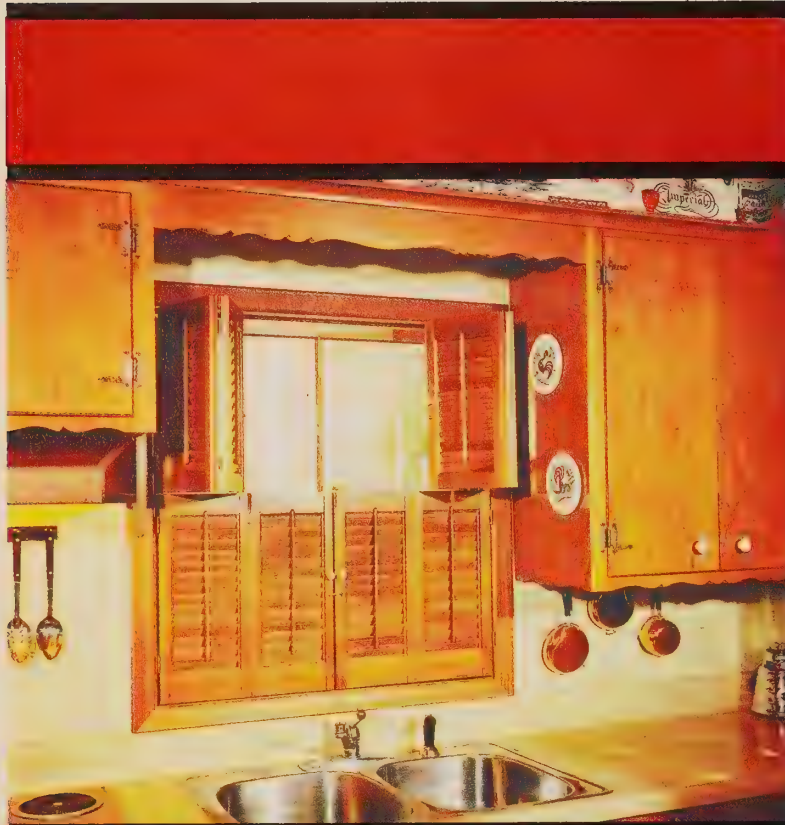

O. M. (Outside mounting measurements)

On O. M. measures the panels will be the exact width and height of the measure given to us. We will make necessary allowances for interpanel hinges and clearance. Window Panels ordered without Hanging Strips - Interpanel hinges mortised . . . hanging hinges not mortised unless otherwise specified. Factory will not mortise hanging hinges for 1-1/8" 9 thick panels.

DECOR SCREENS

MODESTLY PRICED

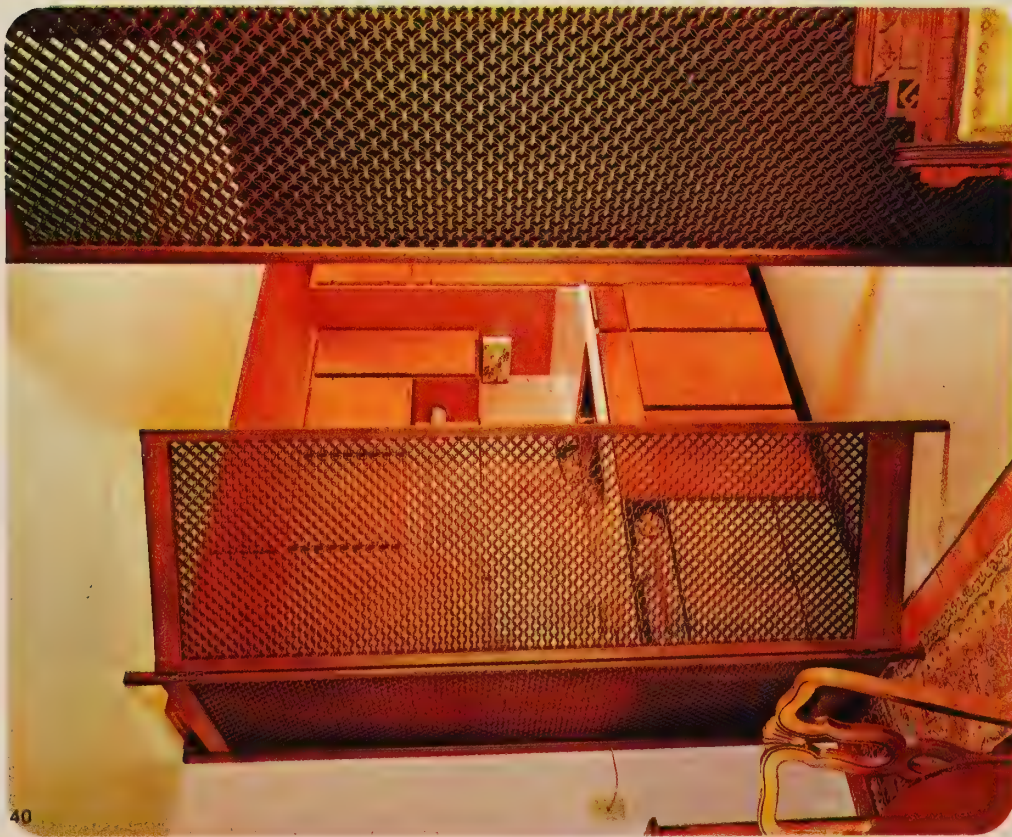

Pinecrest decor screens offer distinctive appeal as room dividers, display accessories, room decors and partitions. Decor screens are constructed from 1-1/8" premium pine and each panel measures 15"Wx72"H. All styles are available as 3 or more panels, in 72" or 78" heights. A beautiful furniture finish is skillfully applied in a rich-mellow tone of Walnut, a perfect contrast to the warm amber hues in Newport, or the contrasting highlights of bright brass metal in Canterbury. Londonderry and Nottingham have versatility in that the louvers can be balanced at various angles to permit light and ventilation control. Winchester has filigree insets which provide a beautiful visual effect and harmonize with many decors. All screens are fitted with brass double action hinges.

STYLES

Londonderry Louvers top, raised panel bottom
 Nottingham Full louvers top and bottom
 Newport Amber diamond top, louvers bottom
 Canterbury ..Gold finish metal top, louvers bottom

SHOJI PANELS - Style A-1

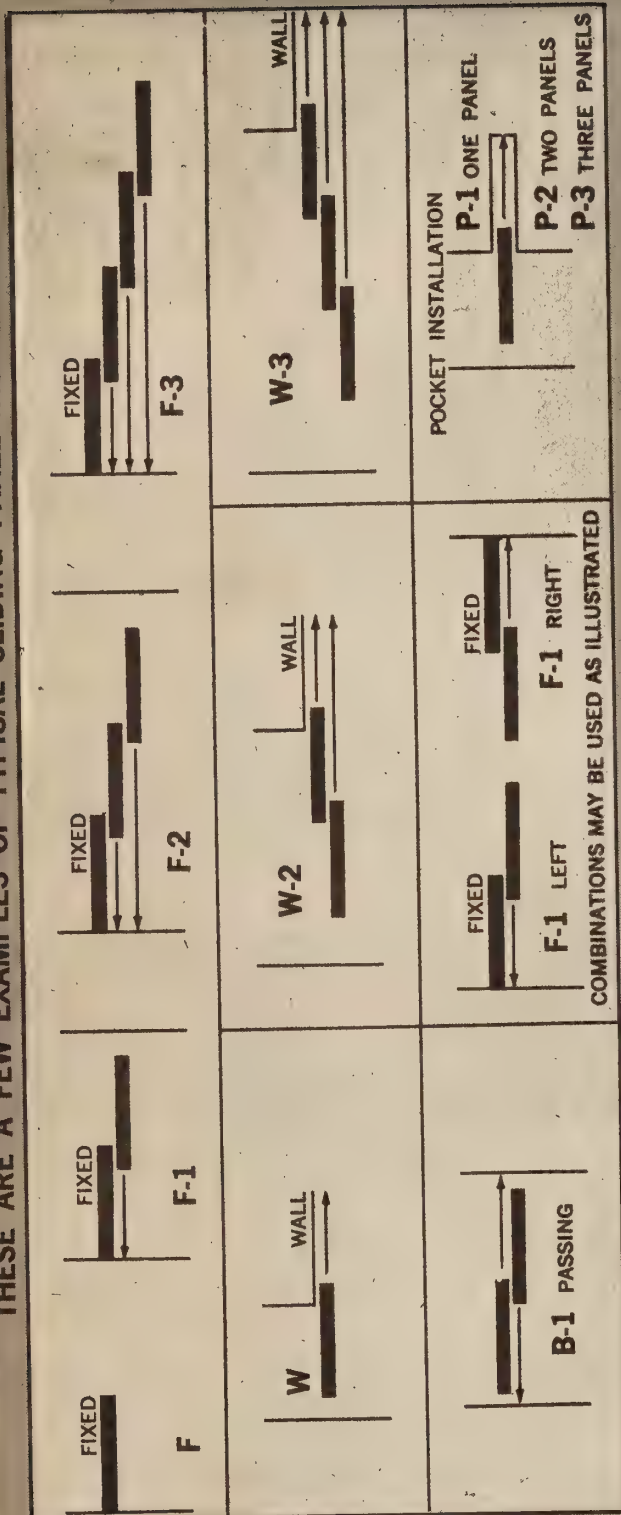

Pure, basic lines, suggest elegant simplicity of Oriental styling. White translucent vellum filler transmits light subtly to achieve the effect. Sliding window panels, dividers, screens, sliding doors can be made to exact requirements. Not only Oriental, but numerous decorating needs can be solved by simply changing the filler and finish.

Refer to Price List H.

Refer to pages 44 & 45 for additional styles of 1-1/8" thick Shoji Panels.

Always Order By Page Number.

THESE ARE A FEW EXAMPLES OF TYPICAL SLIDING PANEL INSTALLATION

Refer to page 21 for track and carriers for SLIDING or SHOJI panels. Use track No. 1500-T-1.

SHOJI DOOR PANELS - Style: A-1 - 1-1/8" thickness - Pine

- 1-1/8" panels have square edges - no bead.
- Give us opening size and we will deduct for track if specified and also add for overlaps.
- Refer to above sketch for proper overlapping of sliding panels.
- Vellum included.
- Available unfinished or finished in Glidden paint or stain.

Standard widths: 12", 15", 18", 24", 36".

Standard heights: 80", 84", 96".

ANY SIZE AVAILABLE TO YOUR REQUIREMENTS.

SHOJI PANELS CAN BE MANUFACTURED AS SINGLE FACED OR DOUBLE FACED PANELS.

TO PRICE STYLE AS SHOWN REFER TO PRICE LIST H.

SHOJI WINDOW PANELS - Style: A-1 - 3/4" thickness - Pine

- 3/4" panels rabbeted and beaded.
- For sliding 3/4" panels special track available. Panels will not be beaded or rabbeted.
- Vellum included.
- Available unfinished or finished in Glidden paint or stain.
- Hardware included.

ARCHITECTURAL BAMBOO

The Architectural Bamboo panels have undergone Chemical, Thermal, and Ultraviolet Light treatment in the manufacturing process. This process has been developed to neutralize and stabilize the basic bamboo material. The recommended method of mounting is by the use of a deep rabbeted frame with the panels free-floating in the frame. Since all merchandise is hand made, we cannot be responsible for slight variances, shrinkage or warping due to climatic changes.

Shell and Mahogany Architectural Panels

Shell & Philippine Mahogany panels may be used as standing screens, sliding panels and dividers for a handsome effect. This fascinating material will appeal to all who are searching for an exciting new effect. The shells were used in the islands for centuries before the days of glass.

SPECIAL SIZES:

Panels up to 4'x12' available. Allow 90 - 120 days for delivery for special sizes. A 50% DEPOSIT IS REQUIRED FOR SPECIAL SIZE ORDERS. Available unfinished or with clear varnish.

We recommend the use of the panels architecturally. They can be incorporated into any type of construction. While hundreds of these Shell and Mahogany panels are now in use as free standing screens and sliding dividers, with excellent results, there is always the possibility of warping due to climatic changes, and we cannot guarantee the panels against this.

STANDARD SIZES:

24" w x 72" h

18" w x 84" h

Available unfinished or with clear varnish.

Hinging available.

DIMENSIONS:

3/4" thickness

1 3/4" wide framing

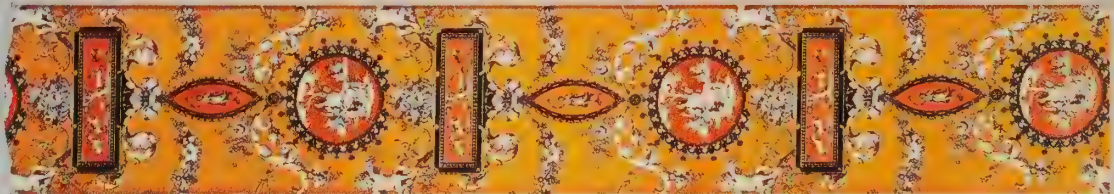

5/8" wide strips

Shell size varies according to panel dimension.

Panels shown each 18" wide.

KUBLAI KHAN GRILLE — STYLE WK

1 3/4" Pine - Massive doweled blocks and turnings assembled in this magnificent grille. Kublai Khan Grille is available in custom sizes unframed, or custom framed to your requirements. Grille is available unfinished only. Because of the large pattern repeat, sizes must be ordered allowing for full design increments. To Price refer to Price List Q. Refer to pages 68 and 69 for additional designs. Refer to page 105 for 1 3/4" Kublai Khan doors. Framed Panel shown - 48 1/2" W x 96" H.

KUBLAI KHAN GRILLE

Style No. V Shown

In Old Persia metal was a premium. Skilled craftsmen painstakingly turned out decorative dowels from hand powered machinery, and crude saws turned out intricate blocks of wood that in the final assemblage gave us Kublai Khan Grille. The strength and durability of Kublai Khan Grille is undisputed, as Old Knight Castles still proudly show this magnificent creation.

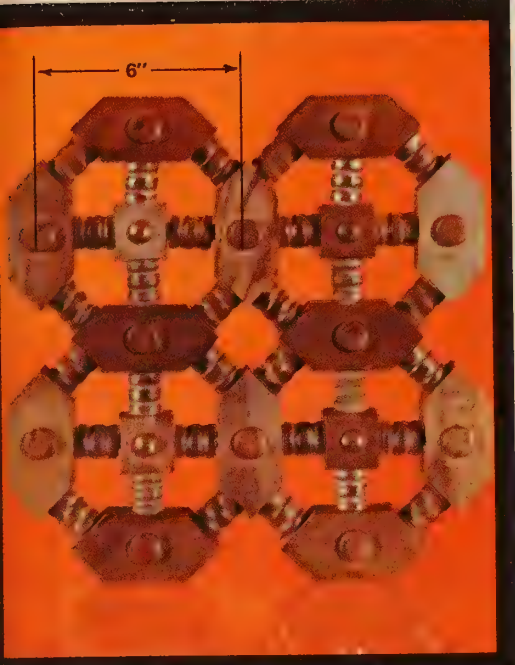

Kublai Khan Grille is used effectively in hundreds of installations: Dividers, doors, screens, railings, gates, window treatments and many more.

Choose from five bold and massive styles. Available in standard 36"W x 96"H sheet or custom framed to your requirements. 1-1/4" Pine.

Available unfinished only.

ALGER CUSTOM SIZE PANELS

Pinecrest has pioneered
a refreshing new approach
in wood filigree.

• Filigree - 1-3/8" Pine.

• Available unframed or framed in
custom sizes.

• Design in increments of 8" x 12".

• Because of the 8" x 12" increments of
the pattern we suggest you supply us
with drawing for custom framed sizes
showing how panels will be installed.
Factory will use special size framing so
full increments can be used. If the size
required is within 8" x 12" increments
our standard framing of 1-3/8" x 1-3/8"
will be used. Any other framing
dimensions special quote only.

• Railing available with or without
uprights. Special quote only.

• Available unfinished or walnut finish.

Design: 01D
Walnut with Sapwood

Design: 09D

Design: 07D

Pinecrest Dimension III Architectural Grilles are the ideal solution to many problem areas where both a functional and decorative dividing unit is needed. These precision made grilles are carved from only select $\frac{3}{4}$ " beechwood and solid walnut with negligible amounts of sapwood to achieve a subtle contrast of light and dark wood tones. Because of our special carving methods, the grilles are carved to only a point at the outside edge, leaving a solid area to form a border. The measure of border will vary with the design. If grilles are used as dividing units, installation is simplified by merely installing a moulding strip around the grille to assure a rigid, stable unit. If grilles are hinged, used on track, or not permanently installed, we recommend additional framing. This will eliminate the tendency of the grilles to twist slightly which is a natural characteristic of hardwoods. Allowances on all sides of inside frame must be given for expansion and contraction due to climate changes. If we frame grilles, clearances will be made by us. Instruction sheets shipped with all unframed orders.

Grille size is 2'x8' and is completely carved on both sides. Special size framed units available whereby 2'x8' modules are adaptable. 24-Hr. Estimating Service Via Air Mail.

Choice of unfinished hardwood, or factory applied browntone finish, or solid walnut with factory applied oiled walnut finish. Custom finishes special quote.

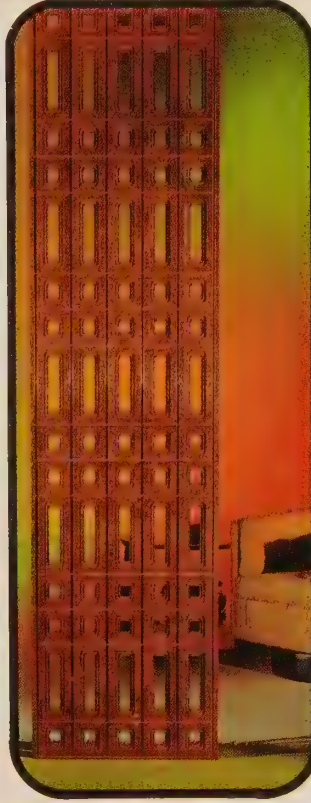

To Price Refer To Price List Q.

Design: 02D

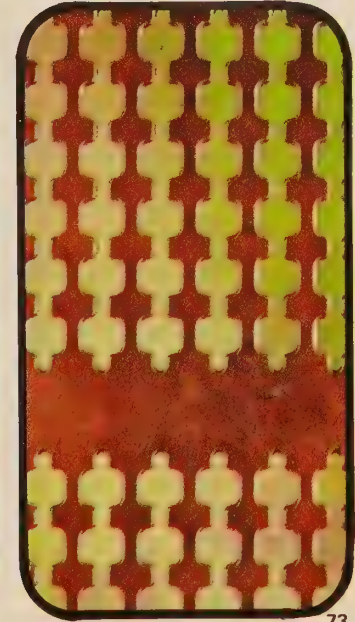

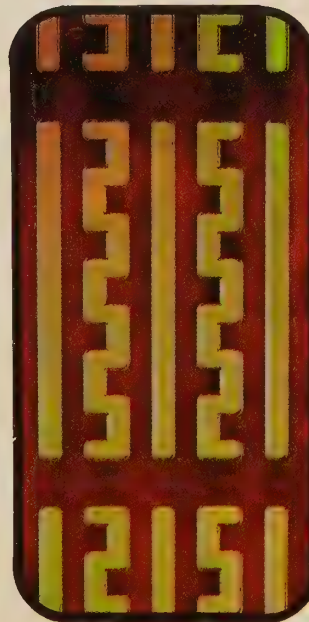

Design: 04D

Design: 00D

Design: 03D

CUSTOM BUILT CARVED MODULAR GRILLES

Versatile . . . mix or match . . . use either open or solid designs, or combine both open and solid. Six beautiful designs available for innumerable combinations of patterns.

Custom built carved modular grilles are constructed from tongue and grooved 12" x 12" squares of $\frac{3}{4}$ " thick select furniture grade hardwood or solid walnut with negligible amounts of sapwood for subtle contrast. Modules are carved two sides.

Select hardwood grilles are available with factory applied rich brown-tone finish and solid walnut grilles with factory applied oiled walnut finish.

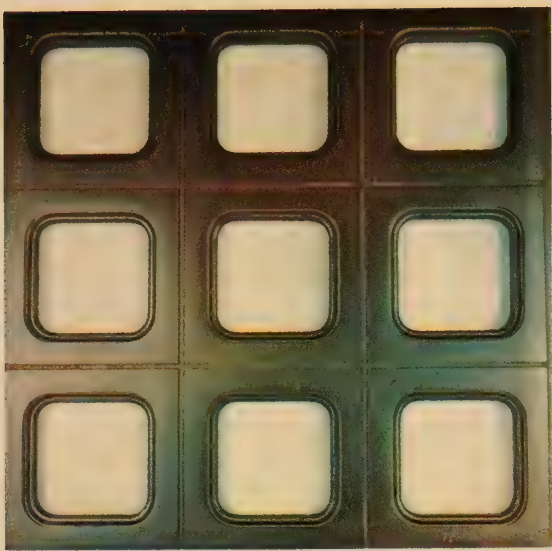

Factory assembled, unframed grilles are available up to 12' wide and 10' high. Grilles over 48 $\frac{1}{2}$ " wide are shipped in sections with splined joints for on-site assembly. Because of the modular system there are no excessive stresses, so minimal on-site framing is required. For custom factory framing, request quotation. Solid wood grilles will expand and contract with changes of humidity and temperature. These dimensional changes

must be provided for by allowing the grille to float in the frame or installation. For expansion and contraction allow 1/8" float for each 24" of grille width, 1/16" float for each 24" of grille height and 1/32" float for grille thickness. When factory frames grilles it will make these allowances.

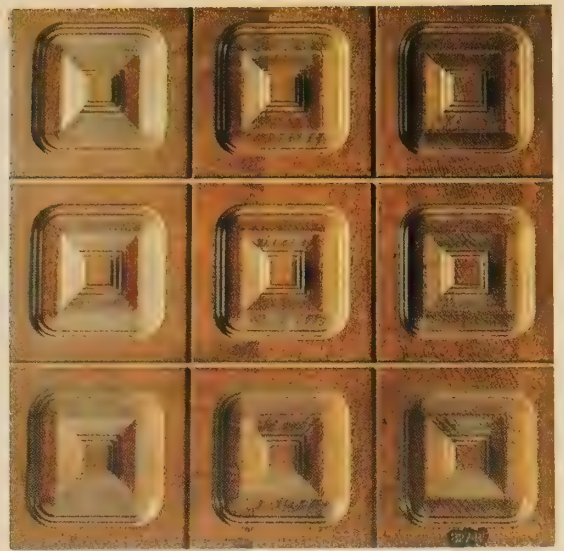

MODULES ONLY

16 modules of one design per carton. Carved 12" x 12" x $\frac{3}{4}$ " modules . . . tongue and grooved. **MANY DECORATIVE USES:** Railings • Wainscoting • Headboards • Wall Paneling • Folding Screens • Table Bases and Tops • Sliding Doors. Available in select hardwood unfinished, or with rich brown-tone finish and solid walnut unfinished, or with oiled walnut finish. Filler modules available with vertical veins only (no carve pattern) for applications that require increments of less than 12" not obtainable from carve design increments of 12" x 12" modules.

Design: ES-1 - (2) 2'x8' Panels Shown

**ENVIRONMENTAL SERIES
"BIRDS IN FLIGHT"**

The designs for these sturdy hand-carved grilles taken directly from nature, can be the keynote to make your interior in keeping with today's environmental trend. Every inch of these decorative grilles shows the care and artistry of hand craftsmanship.

Design: ES-2

Design: ES-3

Design: ES-4

***Jelutong:** It is a soft wood and light in weight. Sapwood is not differentiated by color from heartwood which is white weathering to a light straw color. The grain is almost straight and texture, fine and even. It is relatively free of defects except latex veins, which are not considered defects in this species. The surface is lustrous and accepts stain, varnish and other finishes with excellent results.

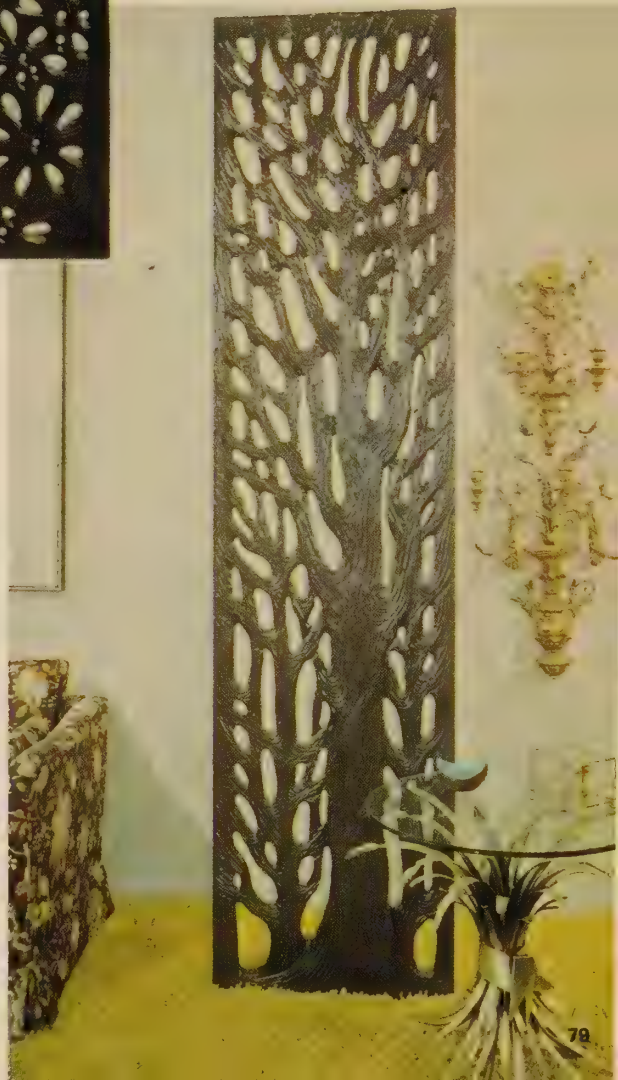

Jelutong panels are edge glued full length strips.

Pine panels are finger glued and edge glued into a strong panel, then carved. This makes for a warp resistant grille.

ENVIRONMENTAL SERIES

Trees, Birds, Flowers . . . The beauties of earth.

Grilles are carved two sides from solid pine or *Jelutong. Other woods available on special order. Request quotation. Sizes available up to 4'x8'. NOTE: Designs as shown are 2'x8'. Any smaller size will cut off part of the design. A 4' wide grille will contain two full design modules. Less than 4', but more than 2' will contain one full design module plus part of another. Grille thickness is 1½". Grilles are shipped unframed and unfinished, or with Walnut finish. Frames of same material are available, although due to the sturdy construction of these grilles they are not necessary. Request quotation for framed grilles. TO PRICE DESIGNS AS SHOWN REFER TO PRICE LIST Q.

Design: ES-5

WIND SONG COLLECTION

Our WIND SONG grilles are rugged hand-carved grilles that may be used with or without a frame. The design and carved textures reflect the hand craftsmanship of the skilled artisan. Grilles are available in 1½" or ¾" thick solid Pine or *Jelutong. Pine grilles are finger glued and edge glued into a strong panel, then carved. This makes for a warp resistant grille. Jelutong panels are edge glued full length strips. Other woods available . . . request quotation.

*For Jelutong wood specifications, refer to page 79. 2'x8' is the most popular size, but grilles are available up to 4'x8'. Three full size panels shown at right are 2'x8'. For framed panels forward specifications for quotation. Panels are carved two sides and are available unfinished or with Walnut finish only.

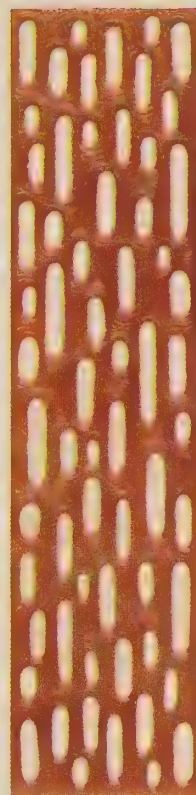

There are innumerable uses for WIND SONG grilles. Refer to page 83 for sketches.

Symphony In Wood Collection

Our Symphony In Wood Collection of screens and dividers are carved from nine plies of laminated African Mahogany. Laminated African Mahogany is a rich appearing imported product fabricated with a waterproof glue which makes it extremely weather resistant. African Mahogany stains extremely well and finishes to a rich subtle tone. Panels are $\frac{3}{4}$ " thick. Symphony In Wood panels are shipped unfinished or with walnut finish unframed. Framing available. Submit specifications for quotation for framed panels.

Opposite page - Design: SIW-A - Carved One Side

This design is carved in increments of 8" in width. Order as 24" or 48" widths. Heights 8'. Panel shown on full page 16" wide. SIW-A also available in Finger-Jointed Pine or Jelutong woods. Refer to page 79 for Jelutong specifications.

Left - Design: SIW-B - Carved One Side or Two Sides

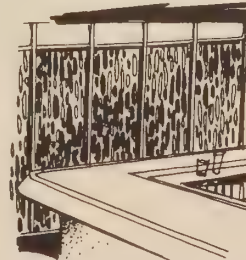

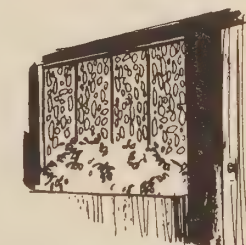

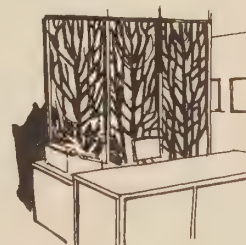

This design is carved in increments of 12" in width. Order 24" or 48" widths. Heights 8'. 2' x 8' panel shown

Portions of panels SIW-A or SIW-B can be left uncarved for solid effect as shown in center on opposite page.

To price designs as shown refer to Price List Q.

Other Woods Available - Request Quotation.

THERE ARE MANY USES FOR OUR SYMPHONY IN WOOD COLLECTION AND OUR ENVIRONMENTAL COLLECTION AS SHOWN ON PAGES 78 and 79. For screens and room dividers, these "carved-through" patterns offer a great variety of decorating possibilities. For example, by placing two carvings back to back with glass, plastic or any number of materials between, many dramatic effects can be created.

Trelliswood Collection

Interior and Exterior TRELLISWOOD Grilles for Dividers, Screens, Window Treatments, Sliding Panels, Enclosures, Ceilings, Foyers, Patios, Partitions, Planters. PALISADE PANELING

SOUTH AMERICAN WOOD . . . SOLID HARDWOOD

The richness of nature can be seen in the beautiful
Graining of this unusual hardwood, Truly a fascinating
and unique type paneling.

Hardwood is cut into varying lengths and thicknesses and glued to hardboard panels measuring approximately 11 $\frac{3}{4}$ "W x 21 $\frac{1}{2}$ " H. Wood fingers extend over hardboard allowing for overlaps to accomplish seam-free installations. Hardboard is serrated, so all types of installations can be accomplished: curves, pillars, . . . everything from terraces to wall coverings.

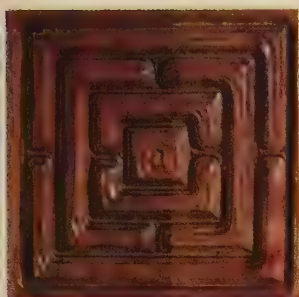

Hand-rubbed oil finish allows the inherent qualities of this appealing wood to flow free.

Panels available in case lots only. 6 panels to case . . . 10.8 sq. ft. to case.

12" x 12" CARVED MODULES

The rich tones of fine woods coupled with luxury suggested by beautiful carving and a note of unmistakable elegance. A basic module that lends itself to a great many applications.

Each of these original designs is carved by modern production methods from $\frac{3}{4}$ " solid hardwood. Available in Black Walnut, Birch, Oak, Ash, Cedar, Redwood, Philippine Mahogany, 9 Ply African Mahogany Laminate and Pine. African Mahogany Laminate also available in $\frac{1}{2}$ " thickness. The 12" squares can be supplied in 36" lengths. Any length panel can be carved if within 12" module.

Refer to page 90 and 91 for additional information and designs.

Refer to Price List R.

...in as many ways as your imagination and creativity can devise

Many of the designs reflect the traditional charm of centuries past while others have a contemporary flair that will blend with the latest trends. Our craftsmen interpret these designs in three dimensions. The use of modern methods to expedite the work allow us to offer these fine carvings at a price within most budgets. Each piece has an individuality, all the latent qualities of that particular piece of wood have been brought out by the

Refer to Price List R.

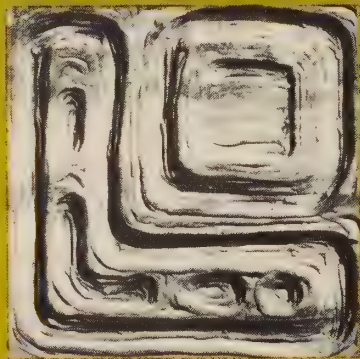

Refer to Pages 89, 91, 92 & 93 for Additional Designs, Sizes and Information.

carvers. Panels may be combined and assembled in many ways to achieve an endless variety of effects. Each panel is designed to either become a part of a continuous "all over" effect or to relate with neighboring panels and create a diversity of interest over the entire surface. Any entry or interior will be more elegant when advantage is taken of the warm rich tones and shadowy patterns of CARVED WOODS.

● Pinecrest has created a renaissance in the centuries old art of fine wood carving by adapting modern production methods to this ancient art. Each of these original designs is carved in kiln dried, selected $\frac{3}{4}$ " solid hardwood by craftsmen in our own shops.

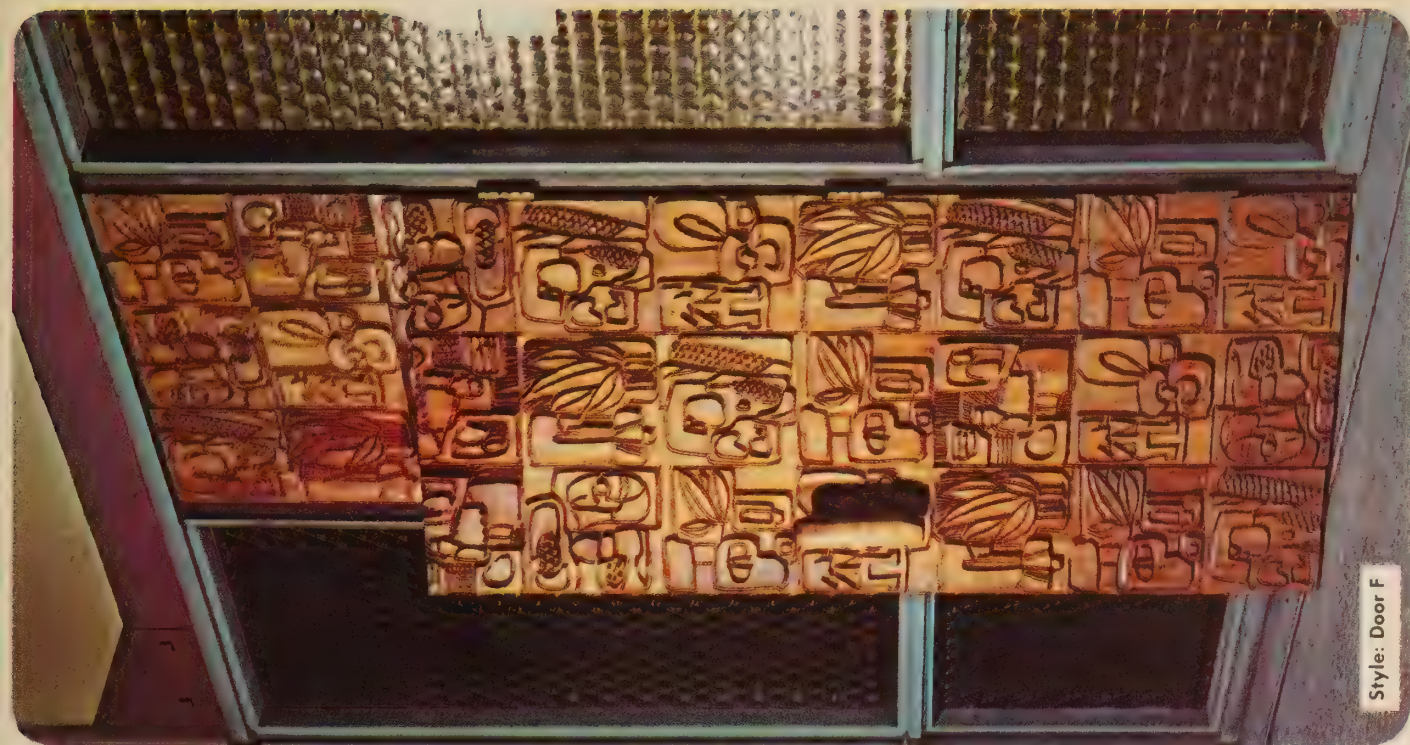

- 12" x 12" Squares a basic module that lends itself to a great many applications. An entire wall, an existing door, desks, cabinets, a bed headboard, kitchen cupboard doors, all can easily be covered by applying mastic to the back of the carvings.
- The twelve inch squares can be supplied in thirty six inch lengths if desired.
- Any length panel can be carved if within 12" module. Maximum length governed only by limitations of lumber itself.

12"x 12" modules available in Black Walnut, Birch, Oak, Ash, Cedar, Redwood, Philippine Mahogany, 9 Ply African Mahogany Laminated, Jelutong & Pine. African Mahogany Laminated also available in $\frac{1}{2}$ " thickness. Refer to page 79 for Jelutong specifications. Panels shipped unfinished. Refer to Price List R.

Elegant carved wood door is achieved by applying panels to solid core flush door. When carving is applied to only one side, the opposite side will be finished in matching material. Complete door $2\frac{1}{2}$ " thick; panels applied one side. Complete door $3\frac{1}{4}$ " thick; panels applied two sides.

Doors and transoms available in Walnut, Oak and Birch unfinished. 3'0" x 6'8" door shown. Door pull additional. Specify right or left door pull.

To price door shown refer to Price List R.

Style: Door F

To permit the widest variety in application, panels are carved in three standard sizes: 12" x 12" squares shown on preceding pages

36"x8" panels ... the intermediate size that lends itself to a multitude of specialized applications.

80"x8" panels ... the full length panel. Designed expressly to permit installation of vertical panels the full length of a door or to cover large areas.

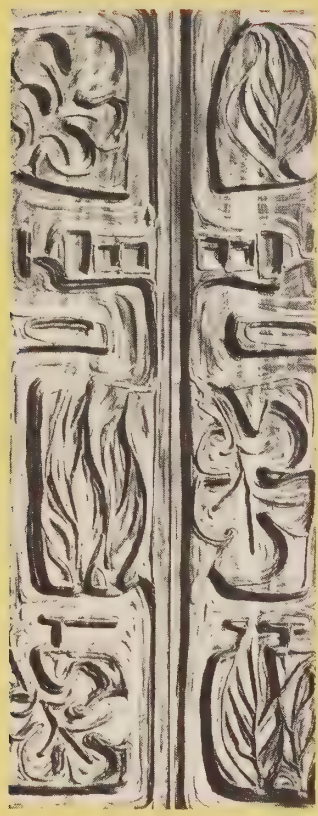

Each of the 36"x8" panels is also available as a full length 80"x8" panel. In pieces of the design of solid wood at each end of the panel, while each of the 36"x8" panels is also available as a 36"x8" panel.

All carvings are supplied unfinished in order that they may be finished to match any decorative scheme.

Available in Black, Walnut, Birch, Oak, Ash, Cedar, Redwood, Philippine Mahogany, 9 Ply African Mahogany, Laminated, Pine, and Jelutong. Refer to page 99 for Jelutong specification.

Each panel is designed to either become a part of a continuous "All Over" Effect or to relate with neighboring panels and create a diversity of interest over the entire surface. Series 2010 and 2080 illustrated.

The El Dorado Collection

THE WORLD'S MOST BEAUTIFUL HAND-CARVED DOORS

PINECREST presents in this catalog the most comprehensive grouping of decorative doors available in the industry. We take great pride in making available our EL DORADO Collection. Authentic hand-carved doors coupled with massive wrought iron bent by strong and experienced hands, warm and colorful bubble glass, heavy wood grilles supported by thick wooden dowels, broad three-dimensional turnings, plank and hand-carved doors accented with decorative handcrafted hardware.

There is no substitute for a solid wood door — its warmth — durability — luxury and excellent finishing qualities can only be compared to the finest of furniture. This is good reason for specifying an EL DORADO door. But besides these excellent features, PINECREST is offering you artistic design and quality craftsmanship AT A PRICE YOU CAN NOW AFFORD. PINECREST IS SPECIFIED BY LEADING ARCHITECTS, BUILDERS AND DESIGNERS.

SPECIFICATIONS:

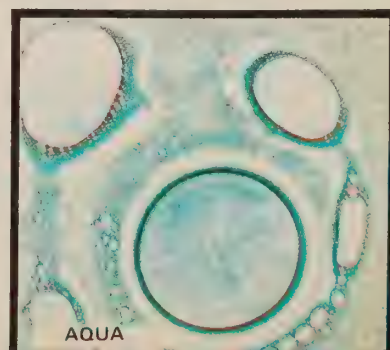

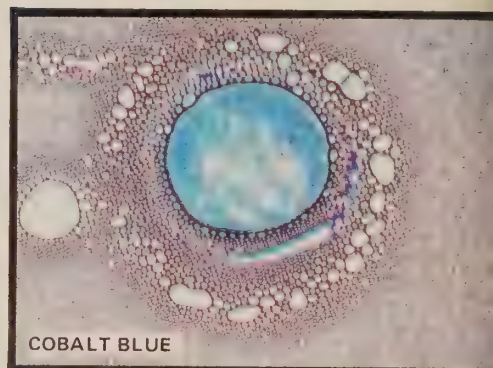

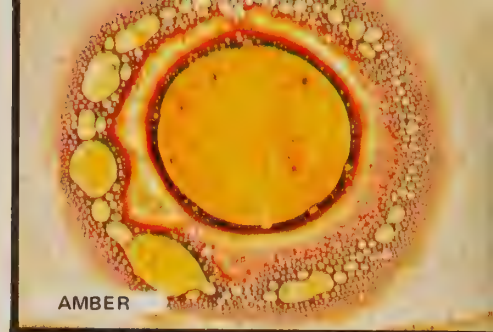

- **Wood** - All doors in the El Dorado Collection will be manufactured from selected kiln-dried Philippine mahogany unless otherwise noted on page showing door style.
- **THICKNESS** - 1-3/4".
- **SIZES** - Standard 36"W x 80"H. Pinecrest manufactures all sizes standard in the building industry. Refer to price list S
- **TRANSOMS & LATERALS** - Available to your specifications. Forward detailed sketch for prompt quotation.
- **HAND-CARVED DOORS** - When doors are specified carved 1 side reverse sides will be raised panels.
- **CUSTOM DESIGNS** - Available to your specifications. Forward detailed sketches. Hand-carved doors can be manufactured with family coat of arms; professional insignia; business identity and numerous others limited only by imagination.
- **DECORATIVE HARDWARE** - Doors shipped without pulls. Pulls shown on El Dorado Doors available. Refer to price list I
- **FINISHING** - All El Dorado doors shipped unfinished.

IMPORTANT

1. Unfinished doors must be safeguarded against extreme moisture and temperature changes.
2. All edges must be sealed and finished immediately.
3. After stain or color finish has been applied door must be completely resealed with clear sealer to prevent warpage and splitting.

We can create any style door. Any carving can be changed to meet your exact requirements. Bubble glass can be inserted into any area up to 6"x23". Special quote only.

Each El Dorado door is completely hand-carved by one craftsman to ensure fine detail and depth of design. El Dorado doors are deeply carved in the same manner as in centuries past, giving beauty that machine carving is incapable of producing.

SIERRA COLLECTION

BEAUTIFUL PHILIPPINE MAHOGANY RAISED PANEL DOORS.

TO PRICE STYLES AS SHOWN REFER TO PRICE LIST U.

SIERRA DOORS SAME BOTH SIDES.

THE RHAPSODY COLLECTION

A NEW CONCEPT IN FLUSH DOOR CONSTRUCTION. Nine plies (a solid half-inch) of fine African mahogany laminate for each face of this beautiful door.

Bonded to a solid core, these rugged exterior grade panels present a tough, durable surface — as contrasted to the average thin-skinned flush door.

Thick solid mahogany panels permit deep carving, with no penetration of the solid core. Such construction provides an architect-approved all-weather door. Each pattern embodies the charm, chisel effect and individuality of the skilled craftsman. Only an exterior Type 1 bonding agent is used to secure the face panel to a solid core. It's a durable and weather resistant door. Available carved one side or two sides.

Many patterns shown have surface fully carved. Some styles of hardware can be installed on this complete pattern. Other styles require a flat uncarved area for installation. An 8" x 16" uncarved area can be left if desired. Specify for left or right door when provision is to be made for uncarved area.

Standard door size - 3'0" x 6'8". Other sizes available (oversize doors have the same amount of carving with wider margins). Thickness of doors is 1 3/4". Doors available unfinished only. Doors shipped without hardware.

For additional styles and information refer to Pages 123 thru 127.

AFRICAN MAHOGANY LAMINATE DOORS

The Rhapsody Collection of doors is executed in a wide variety of designs in order to harmonize with any style of architecture. Appropriate designs will be found to enhance an entry for the home or give distinction to a commercial installation. A well designed carved door can lend distinction and establish an identity to any residential or business location. Each and every carving is individually carved by an expert, experienced wood carver. The technique and individual touch of the carver exists over the entire surface of every carving to give a rugged, chiseled effect. Available carved one side or two sides.

To convert an existing door into a distinctive entry, the carved panels are available.

Any design in the Rhapsody Collection, individually carved, is ready to apply. Application is simple and directions for installation are furnished with each panel. The rich tones of this imported wood lends itself to a variety of finishes. Available unfinished only. Refer to Price List V

Big Game Hunter Door - Style: V. We will custom carve door in design shown or any group of animals desired for the same price. Forward drawing or rough sketch of approximate design and we will custom carve. This door is constructed as a stile and rail door from 1 1/4" Alaskan Yellow Cedar. Available carved one side or two sides. Yellow Cedar has a clear color. It is straight-grained with a fine, even and compact texture. The natural oils in the wood are responsible for the smooth wax-like finish. Yellow Cedar is well proven under the most severe conditions of weather and wear. It has great resistance to rot and termites and has been proven to be a tough fire resistant wood that takes almost twice as long as other soft-woods to reach a flame break-through point. Unfinished only. To price style as shown refer to Price List V.

Style: W - Protestant

Style: X - Judaism

Style: Y - Catholic

RELIGIOUS MOTIFS

Flush Door Construction with 9 plies of African Mahogany Laminate for each face.

Whatever the denomination we will custom carve to your specifications. Shown are only three designs in our ecumenical grouping: Protestant, Catholic and Judaism. For religious motifs other than shown forward drawing and pertinent information for quotation. Refer to page 122 for door specifications. To price styles as shown refer to Price List V.

GENUINE JADE LITES - GRACE AN ENTRANCE WITH A GEMSTONE THAT SYMBOLIZES HAPPINESS, GOOD FORTUNE and GOOD HEALTH. Nine Plies Solid African Mahogany Laminate Doors with "One-of-a-Kind" GENUINE JADE LITES.

Imperial Jade Mining, Inc., is also owned by Russell H. Underdahl, President of Pinecrest Inc. Imperial Jade Mining manufactures Genuine Jade jewelry, carvings, tiles, table tops, corporate crests and many one-of-a-kind doors and panels for the nations leading jewelers, architects and designers. By using Jade you are making yourself a present-day part of one of mankind's most romantic and ageless traditions. Thousands of years ago, before the dawn of history, Jade, the "Jewel of Heaven" already represented to several widely separated young civilizations all that was best and finest in heaven and earth. As these people, particularly the Chinese, progressed through the long centuries, Jade became a religion and a cosmic philosophy graced with wisdom and authority. Carved Jade pieces from Mexico are known to date back to 1500 B.C. The Aztecs considered Jade worth many times its weight in gold. The Maori natives of New Zealand admired Jade for centuries before the white man came. Jade's toughness, plus its susceptibility to carving makes it the ideal gemstone for almost any article.

The doors shown on this page and the opposite page have the same specifications as doors on page 122.

Above - Style: K - This beautiful door graces the Velvet Chair as found at the Performing Arts Center in Milwaukee. Mr. Donald Kennedy, President of Ace Foods is restaurant owner. The Gem Stone Table of Genuine Minerals

Gemstone tables made with agates, jasper, petrified woods, tigereye, jade and like minerals from all over the world. Colorful, practical and unusual. Any size and shape for cocktail, dining, party, end, lamp and occasional tables. Also for business we make conference tables, desk tops, restaurant tables and bar tops.

Each mineral and origin is identified in every table. Truly, beautiful and educational.
